

## PRE-CAST PILES

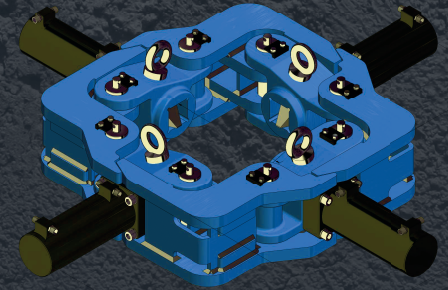

# PRE-CAST 400 CROPPER

Our newly designed cropper for piles from 300-400mm, as its name suggests is used for precast piles (PCC ) with four or more reinforcement bars (rebar).

At only 550kgs the cropper can be mounted to a minimum 6T Excavator.

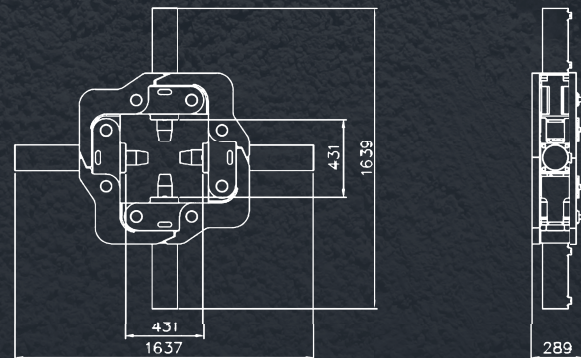

The cropper is designed to remove sections of concrete at approx. 250mm per crop. The 4 powerful rams and blades penetrating past the rebar and into the centre of the pile to leave a minimum of trimming.

Not recommended for pile caps or tight sites – requires a 600 bucket dig all around pile edge.

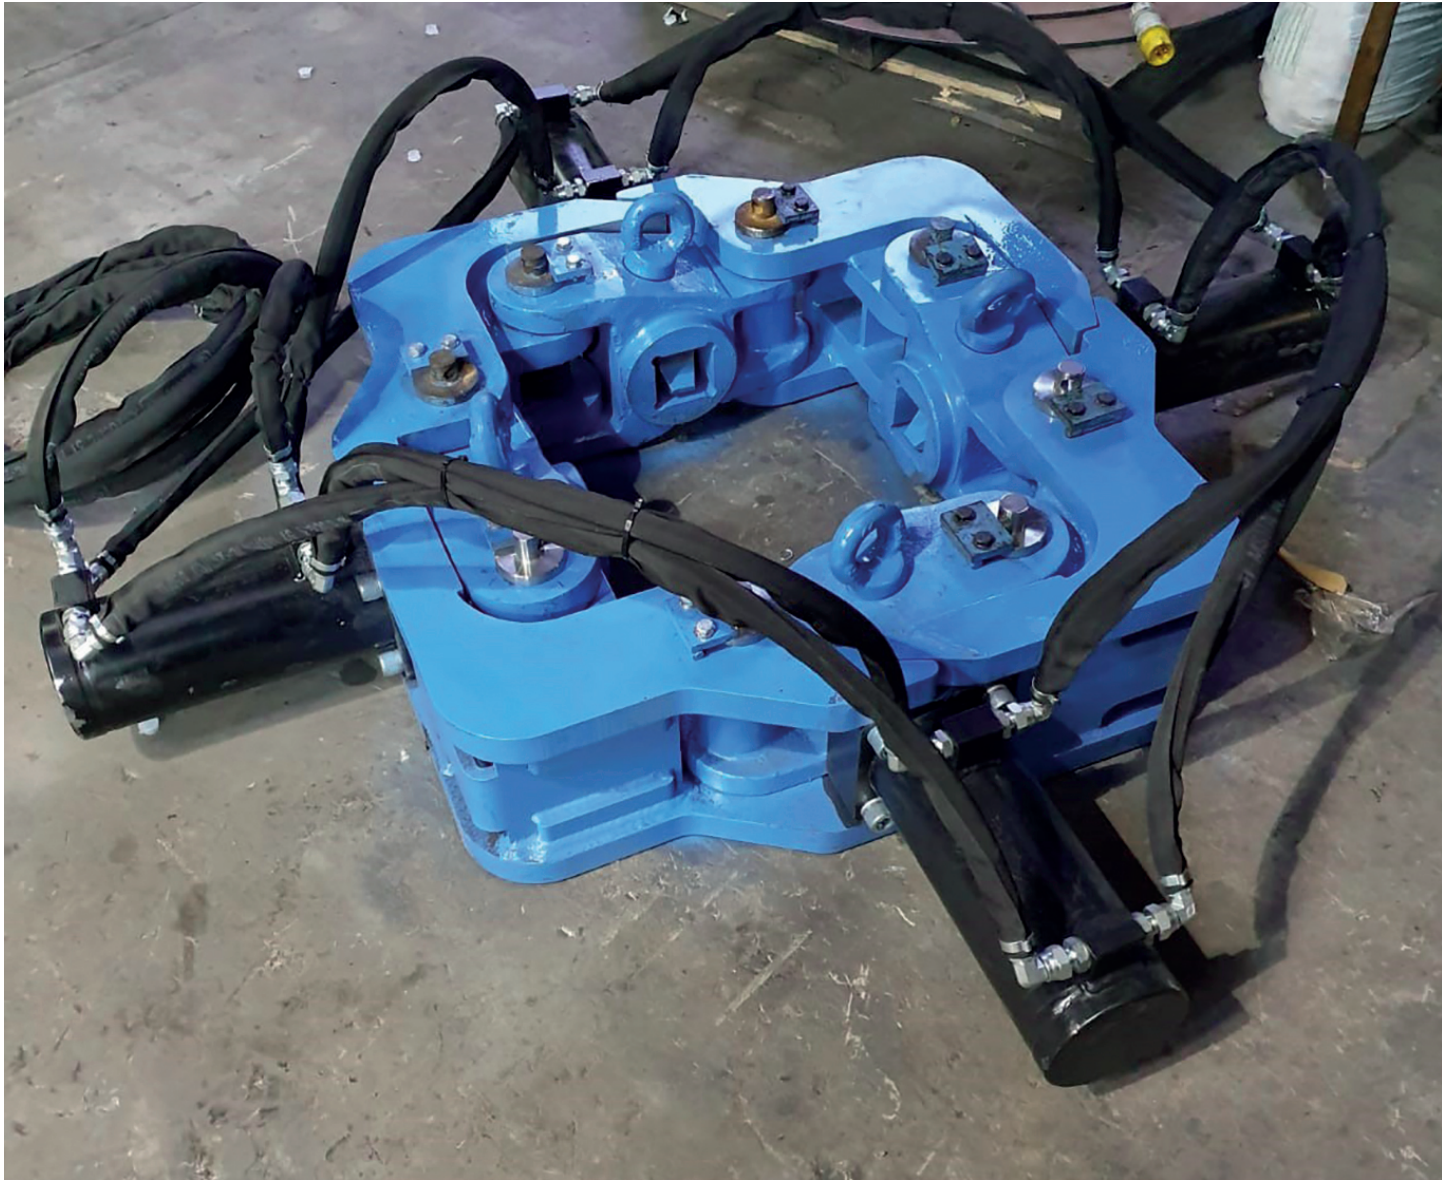

### THE PRECAST 400 CROPPER

|                              | P400    |
|------------------------------|---------|
| Pile Size (mm)               | 300-400 |
| Weight (kg)                  | 550     |
| Length (mm)                  | 1645    |
| Width (mm)                   | 848     |
| Height (mm)                  | 252     |
| Excavator min size (tonne)   | 6       |
| Max operating pressure (bar) | 275     |
| Flow rate (L/Min)            | 90-180  |
